PROFESSIONAL SUMMARY

Final-year Software Engineering student at Sri Lanka Technology Campus with hands-on experience in business analysis, stakeholder management, and generative AI-driven business solutions. Passionate about turning data and insights into actionable decisions. Experienced team leader through IEEE Computer Society roles, with a strong interest in Business Intelligence and data-driven strategy. Currently expanding knowledge in BI tools and data analytics to bridge technical and business domains.

EDUCATION

Sri Lanka Technological Campus (SLTC), Padukka 🔗 <i>BSc (Hons) in Software Engineering</i>	2023 – 2027 GPA: 3.12
St. Thomas' College, Matale 🔗 <i>Secondary Education — GCE Advanced Level (Technology Stream)</i>	Completed: 2020
Christ Church College, Matale 🔗 <i>Primary & Secondary Education — GCE Ordinary Level</i>	Completed: 2017

SKILLS

Business Analysis: Requirements Gathering, Process Modeling, BABOK Fundamentals
BI & Data Tools: Power BI, Excel, SQL, Google Analytics
Programming Languages: Python, JavaScript, Dart, TypeScript, HTML, CSS
Libraries / Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Tools / Platforms: Git, GitHub, VS Code, Google Colab, Overleaf, Figma, Antigravity, Android Studio
Professional Skills: Stakeholder Management, Analytical & Problem-Solving, Cross-Functional Collaboration, Attention to Detail, Creative Thinking, Critical Thinking

PROJECTS

- Impact of Generative AI on Teenagers' Cognitive Development and Critical Thinking** | *Final Year Project (Ongoing)*
- Developing a metacognition-oriented AI agent using Socratic questioning and adaptive scaffolding to foster critical thinking, independent problem-solving, and self-reflection in teenagers aged 13–18.
 - Conducting a controlled mixed-methods study comparing cognitive outcomes between teenagers using the developed agent versus a standard AI assistant, measured via pre/post critical thinking and metacognitive assessments.
 - Technologies:** Flutter, Python (Flask), Supabase, OpenAI API, Google Gemini API
- SmartCare: Patient Readmission Prediction** | *Academic Project* 🐙 GitHub September 2026
- Built a machine learning pipeline to predict 30-day hospital patient readmissions using Random Forest, Decision Tree, XGBoost, and KNN models on a 1,000-record clinical dataset.
 - Applied SHAP for model explainability and deployed a Streamlit prototype for clinical decision support, achieving ROC-AUC of 0.942 with 100% recall using Random Forest.
 - Technologies:** Python, Scikit-learn, XGBoost, SHAP, Pandas, Streamlit
- OGBN-Arxiv GNN Node Classification** | *Academic Project* 🐙 GitHub August 2026
- Implemented and compared Graph Convolutional Network (GCN) and Graph Attention Network (GAT) models for node classification on a 169,343-node citation dataset.
 - Achieved 54.6% test accuracy, analyzed model behavior through embedding visualizations and attention-weight analysis, and presented findings via an interactive Streamlit dashboard.
 - Technologies:** Python, PyTorch, PyTorch Geometric, Scikit-learn, Streamlit, Google Colab
- Pixlore AI Studio** | *Personal Business Project* 🌐 Website August 2026
- Built an AI-driven fashion platform enabling customers to browse and purchase tailored AI-generated product images, runway videos, and custom AI model packages, with an interactive cart system for direct ordering.
 - Designed with modern glassmorphism UI, animations, and scroll-reveal effects; integrated media processing pipelines for optimized AI-generated image and video delivery.
 - Technologies:** React 19, Vite, TypeScript, Tailwind CSS, fluent-ffmpeg, sharp, Oxlint

PROJECTS (CONTINUED)

Utopia – Smart Town Management | *Academic Project*  GitHub

June 2025

- Smart city platform featuring a citizen mobile app and web dashboard for real-time incident reporting, public service access, and emergency notifications.
- Integrated Leaflet maps, browser geolocation, and external APIs for location-based services; implemented role-based authentication and civic payment workflows.
- **Technologies:** Flutter, Dart, React, Node.js, JavaScript, MongoDB

CERTIFICATIONS

- Business Analysis Basics — Simplilearn SkillUp 
- SQL (Basic) — HackerRank 
- Software Engineer Intern — HackerRank 
- Certificate of Appreciation — Vice-Chairperson, IEEE CS Student Branch Chapter of SLTC 

HONORS, AWARDS & EXTRACURRICULAR

- Vice-Chairperson, IEEE Computer Society Student Branch Chapter, SLTC — 2025 – 2026
- Logistics Sub-Committee Head, IEEE CS Student Branch Chapter, SLTC — 2024 – 2025
- Founder, AI Content & Business Solutions "Pixlore" — AI influencer models and promotional video/motion content across TikTok, YouTube, and Facebook
- Co-Chair, IEEE Codemania V5.0 — IEEE CS Student Branch Chapter, SLTC
- Coordination Team Head, IEEE Day 2025 — IEEE CS Student Branch Chapter, SLTC
- Program Team Head, Arduino Challenge 2025 / Decode Xtreme 2024 / Git Genius 2024 — IEEE Student Branch Chapter, SLTC
- Marketing & Promotion Head, Master Designer — SLTC Media Unit
